

Pay for petrol with BIL and CarPay-Diem!

Luxembourg, 2 December 2019: BIL has teamed up with the start-up CarPay-Diem to launch a new mobile payment service for fuel – a first in Luxembourg. Starting today, BIL clients can use the “Pay @ pump” service in partnering petrol stations via the BILnet mobile app on their smartphone.

Forget going to the till to pay for fuel. Offered through the BILnet mobile app, the service Pay @ pump developed jointly with the Luxembourgish start-up CarPay-Diem means you can pay for petrol via your smartphone.

How does it work? When a driver arrives at a partner petrol station, they select the “Pay for my fuel” service in the BILnet mobile app and choose the pump they want to use on their smartphone screen. They will receive instant confirmation that the pump is ready. Then all they have to do is fill up. Once they’ve finished, the payment is made automatically and the receipt for the transaction appears on their smartphone screen. They can leave the petrol station without a second thought. Soon, clients will also have the possibility of receiving special offers in the shops of CarPay-Diem’s partner petrol stations, directly in the app.

“We are looking to enhance our services to simplify our clients’ lives. Our partnership with CarPay-Diem is a prime example of this. Accessible through the BILnet mobile app, this user-friendly and innovative service enables our clients to save time whenever they fill up,” explains Olivier Debehogne, Head of Retail and Private Banking Luxembourg, and Digital.

“In this day and age, banks must diversify their services and innovate if they wish to keep meeting their clients’ needs. BIL has understood this reality and positioned itself as a pioneer in this regard in Luxembourg. Adding CarPay-Diem to the BILnet app opens up a new experience to drivers while also adding value for partner petrol stations. It really is a win-win approach,” notes Frédéric Stiennon, CEO of CarPay-Diem.

The network of partner petrol stations will gradually be extended over the coming weeks. To find out more, visit www.bil.com/pay@pump.

About Banque Internationale à Luxembourg (BIL):

About CarPay-Diem

CarPay-Diem is a platform that allows any mobile app or connected car to activate any pump and for payment to be made from inside the vehicle. The process couldn't be simpler for the driver: as they pull into the petrol station, their smartphone will automatically be prompted to show the number of the nearest pump. The driver is then invited to fill their tank. Once they've replaced the nozzle on the pump, the receipt for the transaction will be shown on their smartphone screen. CarPay-Diem processes the payment and any loyalty points. At the same time, the petrol station sends targeted marketing to the driver to encourage them to come into the shop to make additional purchases.

The CarPay-Diem platform is compatible with over 100,000 petrol stations and a variety of payment methods to provide drivers and fuel vendors with maximum flexibility.

The CarPay-Diem service is compatible with fuel retailers' mobile apps, as well as other popular mobile apps and connected cars. This ensures that the service is available to millions of drivers in the countries in which CarPay-Diem has a presence.

CarPay-Diem has processed over EUR 10 million in payments since its launch in January.
